

Dear Axon Team,

I had a lengthy chat with Hanslee earlier this evening and he was telling me how appreciative he is for all the work your team has done to make the ITS event CMS project successful. Although the work to organise and run Integrated Technologies Singapore 2009 is far from over, it is clear that he has got himself a solid online registration platform to assist him in achieving his goal of getting quality visitors from the region and more to register, attend and benefit from the trade event. ITS event CMS v.1 has empowered him by not only listing ITS2009 registrants profile and its statistics, but also enables him to archive them for future marketing, research and re/development opportunities.

Thanks to its dedicated staff, Axon has proven yet again to be an efficient IT provider that meet the demand of business environments for development and customization of online and offline applications. I would like to say my utmost thanks especially to Amit for taking in this project and his belief that it is possible, Shah for being intuitive and patient in masterminding the database processes and pushing himself further to meet my requirements, and lastly to the other team members, Ida and Shiela who in their own way make this project possible.

Thank you.

Kind Regards,

Hanslee Azhar

Director

Integrated Technologies Singapore
